Twp. : MARLBORO
Block: 360
Lots : 7

INITIAL APPLICATION REVIEW

The Freehold Soil Conservation District has conducted our initial review of the plans submitted for the above referenced application and finds them to be incomplete. The following deficiencies must be addressed in order for the application to be complete.

1. Document stability of the final outfall of the system (i.e. the existing inlet on Boundary Road). Provide a point of discharge analysis.
2. Provide a site specific Sequence of Construction.
3. Include sheets 15 and 16 in the Soil Erosion and Sediment Control Plan set.

Please incorporate the above items into a revised soil erosion and sediment control plan and forward three (3) sets, along with supporting calculations, to our office for further review. These plans must be signed and sealed by a professional architect or engineer. Upon review and determination that the items have been correctly and completely addressed in accordance with the State Standards for Soil Erosion and Sediment Control, the application will be considered complete and recommended for certification. If you have any questions, please contact our office.

Respectfully,

Timothy E. Thomas
Resource Conservationist
